

January 2017

ToxMinds BVBA is a chemical safety consultancy headquartered in Brussels, Belgium with a subsidiary office in Düsseldorf, Germany. We provide scientific, regulatory and strategic advice to a broad range of industries that are subject to human health and environmental legislations. With our broad industry experience, we support our clients from the chemical and consumer products industries in bringing safe, regulatory compliant and publicly acceptable products to the market.

To support and further strengthen our team, we are looking for a

Research Associate (Chemical Safety)

Job description

This is an exciting opportunity for graduates to begin a career in scientific and regulatory consulting. In this position, you will be a part of a consultant team supporting our industry clients in assuring chemical safety and EU regulatory compliance of industrial chemicals, consumer and cosmetic products and pharmaceuticals. You will receive substantial training on chemical hazard and risk assessment as well as related EU regulatory frameworks. Initially, your job will include:

- Identification of toxicological and environmental data in public and commercial databases
- Quality analysis, robust study summaries and accurate presentation of information related to the effects of chemicals on humans and the environment
- Data gap analysis and identification of testing strategies under consideration of animal alternatives including quantitative structure activity analysis (QSAR) and in vitro approaches
- Toxicological and ecotoxicological hazard assessments
- Registration dossier preparation as required under EU chemicals regulations

Required profile

- Higher education degree in chemistry or biology and/or related sub-disciplines including toxicology, ecotoxicology, environmental chemistry or environmental health sciences
- Good oral and written communication skills in English; additional knowledge of German or another EU language is a plus
- Strong technical and data evaluation skills; meticulous attention to detail; flexibility and enthusiasm for working on a variety of tasks

Our offer

- Competitive salary and performance-oriented bonus scheme
- Possibility for professional development and training
- Contact and interactions with industry clients from the EU, US, Asia and Latin America
- Enjoyable working environment in a small but growing and dynamic and multinational team

This opportunity is open for our offices in Brussels or Düsseldorf. Are you interested? For further information about ToxMinds, please consult our website at www.ToxMinds.com. To apply, please send your CV and a letter of motivation to info@toxminds.com.
