# COSMETIC AND CONSUMER PRODUCTS

---

## Ensuring the safety of ingredients present in cosmetics and consumer products is at the core of what we do at ToxMinds.

Our team of experienced toxicology and risk assessment specialists provides creative, science-based solutions to the cosmetic and consumer product industries' ongoing and new business initiatives.

We apply new risk assessment methodologies by leveraging on recent advancements in the understanding of endpoint specific mode of actions (MoA) and/or adverse outcome pathways (AOP).

## Our **dedicated services** for the **cosmetics** and **consumer product industry** include:

- SCCS guideline compliant ingredient safety assessments
- SAR-based analogue identification and read-across justifications
- Assessment of endocrine disrupting properties
- Identification of mechanism-based *in chemico* and/or *in vitro* testing strategies to fill endpoint data gaps
- Development of product information files (PIF) and notification via CPNP (Cosmetic Product Notification Portal) for cosmetic products
- Assessments of extractables and leachables in packaging materials
- Feasibility and safety screening of new technologies, including botanicals and nanomaterials
- Due diligence evaluation of new business ventures
