

REACH REGULATION

The EU REACH Regulation (EC) No. 1907/2006) is the EU's strategy to manage the manufacture, import and use of chemical substances in the EU.

Since its implementation in 2007, ToxMinds has been providing comprehensive technical and regulatory support to assist our clients in the preparation, submission and defence of their registration dossiers.

To date, we have developed more than 500 submissions to ECHA and continue to provide consortium management services to four European REACH consortia.

We offer a **range of services** to assess **your chemical portfolio** in accordance with **the regulation**:

- Portfolio evaluation and strategic regulatory consulting
- Data compilation, evaluation of non-testing approaches and waiving opportunities, final data gap analysis
- Analogue identification and RAAF-conform read across justification
- Management of testing programmes
- Preparation of robust study summary (RSS) of physico-chemical, environmental fate, ecotoxicology and human toxicology studies in IUCLID
- Tiered human and environmental exposure modelling and risk assessment
- Development of complete registration dossiers
- Post-submission support (e.g., client representation with – and response to – authorities)
- Consortium/SIEF management and third party representation
- LoA cost determinations and negotiations
